**Durability and
quality without
maintenance!**

EcoBlocks

for sailing

EcoBlocks are maintenance-free blocks made of a mixture of bamboo saw-dust and a resin of recycled high quality plastics. This very durable composite resembles wood in appearance and smell but has different properties. It does not absorb water, which makes it very resistant to adverse weather conditions. Does not require maintenance or impregnation, there is no need to renew it. Fittings in **EcoBlocks** are made of strong stainless steel (AISI316), its surfaces are polished mechanically. The sheaves have slide-bearings and are made of black Ertacetal. The strong stainless steel axle bolt is secured against twist and loss.

The advantages of the **EcoBlocks**:

- ✓ fully ecological, subject to 100% re-use,
- ✓ highly durable & resistant to external damage,
- ✓ no water absorption,
- ✓ no need for oil or varnish protection,
- ✓ sheaves with slide bearings,
- ✓ fittings are made of strong stainless steel (AISI316).
